

Wastewater Treatment

- WWTP Operation – CWT
- ORC & On-site Water Treatment
- Licensed WWTP Operators
- Mobile Treatment Systems

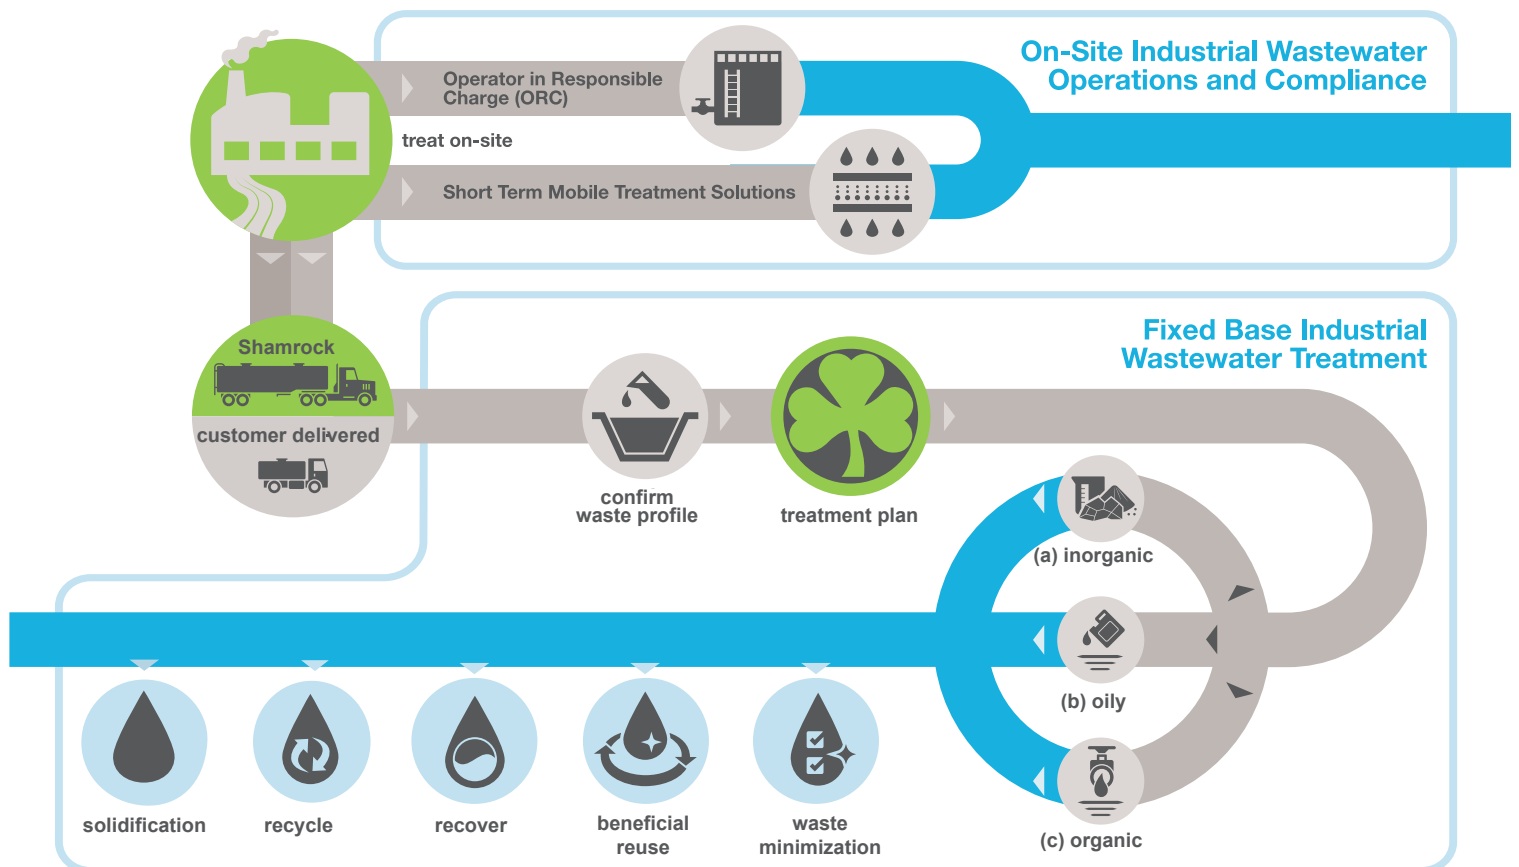

Fixed Base Industrial Wastewater Treatment

Our **Centralized Waste Treatment (CWT)** facility processes a wide array of waste streams from landfills, manufacturing plants, industrial sites and customer sources. We treat more than 100 million gallons of wastewater each year. Shamrock's transportation fleet provides large or small-scale delivery of wastewater to our CWT.

On-Site Industrial Wastewater Operations and Compliance

Our **Operator in Responsible Charge (ORC)** program gives customers peace of mind and flexibility. Shamrock ORCs assume responsibility for customer-owned WWTP operations, compliance and permit requirements.

Short Term Mobile Treatment Solutions are customized temporary systems for plant upsets, emergency response, and other event occurrences.

List of Services

Civil Construction

- Landfill Cell Construction
- Landfill Closures
- Site Remediation
- Pond Closures

Stream Restoration

- New Channel Construction
- Stream Channel Restoration
- Structure Installation
